QNG - Qualitätssiegel Nachhaltiges Gebäude

The Qualitätssiegel Nachhaltiges Gebäude (Quality Seal for Sustainable Buildings), developed by the German Federal Ministry for Housing, Urban Development and Building (BMWSB), defines requirements for the ecological, socio-cultural, and economic quality of buildings. The Sentinel Holding Institut evaluates construction products in accordance with QNG requirements for certification and awards the QNG ready label. Compliance with the QNG standard is a prerequisite for eligibility for the KfW funding programme. For certain product groups, the QNG currently has no specific requirements defined. Although classified as not assessment-relevant, these products remain suitable for QNG-certified projects.

Criteria	Pos. / product group	Considered substances	QNG assessment
3.1.3 Schadstoffvermeidung in Baumaterialien	not applicable	not applicable	QNG ready - Not relevant for assessment

DGNB New Construction 2023

The DGNB System (German Sustainable Building Council) assesses the sustainability of various types of buildings. It can be applied to both large-scale private and commercial projects as well as smaller residential buildings. The 2023 version sets high standards for ecological, economic, socio-cultural, and functional aspects throughout the entire life cycle of a building.

Criteria	No. / Relevant building components / construction materials / surfaces	Considered substances / aspects	Quality level
ENV 1.2 Local environmental impact, 03.05.2024 (3rd edition)	not applicable		Not relevant for assessment

Criteria	No. / Relevant building components / construction materials / surfaces	Considered substances / aspects	Quality level
ENV 1.2 Local environmental impact, 29.05.2025 (4th edition)	not applicable		Not relevant for assessment

BNB-BN Neubau V2015

The Bewertungssystem Nachhaltiges Bauen (Assessment System for Sustainable Building) is a tool for evaluating public office and administrative buildings, educational facilities, laboratory buildings, and outdoor areas in Germany. The BNB was developed by the former Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) and is now overseen by the Federal Ministry for Housing, Urban Development and Building (BMWSB).

Criteria	Pos. / product type	Considered substance group	Quality level
1.1.6 Risiken für die lokale Umwelt			Not relevant for assessment

14792-10-1013

GIRA

EU taxonomy

The EU Taxonomy classifies economic activities and products according to their environmental impact. At the product level, the EU regulation defines clear requirements for harmful substances, formaldehyde and volatile organic compounds (VOCs). The Sentinel Holding Institut GmbH labels qualified products that meet this standard.

Criteria	Product type	Considered substances	Assessment
DNSH - Pollution prevention and control			Not relevant for assessment

BREEAM DE Neubau 2018

BREEAM (Building Research Establishment Environmental Assessment Methodology) is a UK-based building assessment system that evaluates the sustainability of new constructions, refurbishments, and conversions. Developed by the Building Research Establishment (BRE), the system aims to assess and improve the environmental, economic, and social performance of buildings.

Criteria	Product category	Considered substances	Quality level
Hea 02 Indoor Air Quality			Not relevant for assessment

Product labels

In the construction industry, high-quality materials are crucial for a building's indoor air quality and sustainability. Product labels and certificates offer guidance to meet these requirements. However, the evaluation criteria of these labels vary, and it is important to carefully assess them to ensure products align with the specific needs of a construction project.

Products bearing the Sentinel Holding Institute QNG-ready seal are suitable for projects aiming to achieve the "Qualitätssiegel Nachhaltiges Gebäude" (Quality Seal for Sustainable Buildings). QNG-ready products meet the requirements of QNG Appendix Document 3.1.3, "Avoidance of Harmful Substances in Building Materials." The KfW loan program Climate-Friendly New Construction with QNG may allow for additional funding.

The C2C label identifies products whose design concept follows a "cradle-to-cradle" approach based on a closed raw material cycle, rather than merely offering simple recycling or disposal options. At the "Gold" and "Platinum" levels, emission criteria are also taken into account. However, the requirements are less strict than those necessary for the SHI Indoor Air Quality certification.

Konformitätserklärung RoHS

Sehr geehrte Damen und Herren,

die Elektro- und Elektronikgeräte-Stoff-Verordnung (ElektroStoffV, zur Umsetzung der Richtlinie (EU) 2015/863 der Kommission vom 31. März 2015 [RoHS II]) verbietet das Inverkehrbringen von Elektro- und Elektronikgeräten im Sinne des § 2 Nr. 1 der ElektroStoffV, wenn darin homogene Werkstoffe verarbeitet sind, die einen oder mehrere der in der Verordnung genannten Stoffe in einer höheren als der zulässigen Höchstkonzentration enthalten.

Betroffen sind zum aktuellen Zeitpunkt Blei, Quecksilber, sechswertiges Chrom, polybromiertes Biphenyl (PBB), polybromierte Diphylenether (PBDE), Di(2-ethylhexyl)phthalat (DEHP), Butylbenzylphthalat (BBP), Dibutylphthalat (DBP) und Diisobutylphthalat (DIBP), die je homogenem Werkstoff die zulässige Höchstkonzentration von 0,1 Gewichtsprozent nicht überschreiten dürfen, sowie Cadmium, das nur bis zu einer Höchstkonzentration von 0,01 Gewichtsprozent je homogenem Werkstoff enthalten sein darf.

Die von Gira hergestellten Elektro- und Elektronikgeräte im Sinne der ElektroStoffV beinhalten keine der dort genannten Stoffe in einer höheren als der zugelassenen Höchstkonzentration, unter Berücksichtigung der Ausnahmen der Anhänge III und IV der RoHS-Richtlinie.

Mit freundlichen Grüßen

Merkmale

- Bruchsicher.

Hinweise

- Auch für Kanalinstallationen geeignet.
 - Abdeckrahmen (1- bis 5fach) in Verbindung mit Dichtungsset auch für die Montage wassergeschützt Unterputz IP44 geeignet.
-
