## SHI Product Assessment 2024

Since 2008, Sentinel Holding Institut GmbH (SHI) has been establishing a unique standard for products that support healthy indoor air. Experts carry out independent product assessments based on clear and transparent criteria. In addition, the independent testing company SGS regularly audits the processes and data accuracy.

Criteria	Product category	Harmful substance limit	Assessment
SHI Product Assessment	Wood materials	TVOC $\leq 300 \mu\text{g}/\text{m}^3$ Formaldehyd $\leq 36 \mu\text{g}/\text{m}^3$	Indoor Air Quality Certified
Valid untill: 03 March 2027			

Product:

**Glattkantbrett Fichte/Tanne, Gehobelt**

## **QNG - Qualitätssiegel Nachhaltiges Gebäude**

The Qualitätssiegel Nachhaltiges Gebäude (Quality Seal for Sustainable Buildings), developed by the German Federal Ministry for Housing, Urban Development and Building (BMWSB), defines requirements for the ecological, socio-cultural, and economic quality of buildings. The Sentinel Holding Institut evaluates construction products in accordance with QNG requirements for certification and awards the QNG ready label. Compliance with the QNG standard is a prerequisite for eligibility for the KfW funding programme. For certain product groups, the QNG currently has no specific requirements defined. Although classified as not assessment-relevant, these products remain suitable for QNG-certified projects.

Criteria	Pos. / product group	Considered substances	QNG assessment
3.1.3 Schadstoffvermeidung in Baumaterialien	not applicable	not applicable	QNG ready - Not relevant for assessment

Criteria	Assessment
ANF2-WG1 Nachhaltige Materialgewinnung	May positively contribute to the overall building score

**Verification:** PEFC Zertifizierung

## **DGNB New Construction 2023**

The DGNB System (German Sustainable Building Council) assesses the sustainability of various types of buildings. It can be applied to both large-scale private and commercial projects as well as smaller residential buildings. The 2023 version sets high standards for ecological, economic, socio-cultural, and functional aspects throughout the entire life cycle of a building.

Criteria	No. / Relevant building components / construction materials / surfaces	Considered substances / aspects	Quality level
ENV 1.2 Local environmental impact, 03.05.2024 (3rd edition)			Not relevant for assessment

Criteria	Quality level
ENV1.3 Responsible resource extraction	May positively contribute to the overall building score
<b>Verification:</b> PEFC Zertifizierung	

Criteria	Assessment
SOC1.2 Indoor air quality (*)	May positively contribute to the overall building score

Criteria	No. / Relevant building components / construction materials / surfaces	Considered substances / aspects	Quality level
ENV 1.2 Local environmental impact, 29.05.2025 (4th edition)	not applicable		Not relevant for assessment

Product:

**Glattkantbrett Fichte/Tanne, Gehobelt**

SHI Product Passport no.:

**13180-10-1008**

**binderholz** ■

## **DGNB New Construction 2018**

The DGNB System (German Sustainable Building Council) assesses the sustainability of various types of buildings. It can be applied to both large-scale private and commercial projects as well as smaller residential buildings.

Criteria	No. / Relevant building components / construction materials / surfaces	Considered substances / aspects	Quality level
ENV 1.2 Local environmental impact			Not relevant for assessment

Product:

**Glattkantbrett Fichte/Tanne, Gehobelt**

SHI Product Passport no.:

**13180-10-1008**

**binderholz** ■

## **BNB-BN Neubau V2015**

The Bewertungssystem Nachhaltiges Bauen (Assessment System for Sustainable Building) is a tool for evaluating public office and administrative buildings, educational facilities, laboratory buildings, and outdoor areas in Germany. The BNB was developed by the former Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) and is now overseen by the Federal Ministry for Housing, Urban Development and Building (BMWSB).

Criteria	Pos. / product type	Considered substance group	Quality level
1.1.6 Risiken für die lokale Umwelt			Not relevant for assessment

Criteria	Assessment
1.1.7 Nachhaltige Materialgewinnung	May positively contribute to the overall building score
<b>Verification:</b> PEFC Zertifizierung	

Product:

**Glattkantbrett Fichte/Tanne, Gehobelt**

SHI Product Passport no.:

**13180-10-1008**

**binderholz** ■

## EU taxonomy

The EU Taxonomy classifies economic activities and products according to their environmental impact. At the product level, the EU regulation defines clear requirements for harmful substances, formaldehyde and volatile organic compounds (VOCs). The Sentinel Holding Institut GmbH labels qualified products that meet this standard.

Criteria	Product type	Considered substances	Assessment
DNSH - Pollution prevention and control			Not relevant for assessment
<b>Verification:</b> Reines Holzprodukt			

Product:

**Glattkantbrett Fichte/Tanne, Gehobelt**

SHI Product Passport no.:

**13180-10-1008**

**binderholz** ■

## **BREEAM DE Neubau 2018**

BREEAM (Building Research Establishment Environmental Assessment Methodology) is a UK-based building assessment system that evaluates the sustainability of new constructions, refurbishments, and conversions. Developed by the Building Research Establishment (BRE), the system aims to assess and improve the environmental, economic, and social performance of buildings.

Criteria	Product category	Considered substances	Quality level
Hea 02 Indoor Air Quality	Wood-based products	Emissions: Formaldehyde, TVOC, TSVOC, carcinogens	Exemplary quality
<b>Verification:</b> Prüfbericht des Instituts SGS Institut Fresenius vom 15.02.2021 (Prüfbericht 5160889)			

Product:

**Glattkantbrett Fichte/Tanne, Gehobelt**

SHI Product Passport no.:

**13180-10-1008**

**binderholz** ■

## Product labels

In the construction industry, high-quality materials are crucial for a building's indoor air quality and sustainability. Product labels and certificates offer guidance to meet these requirements. However, the evaluation criteria of these labels vary, and it is important to carefully assess them to ensure products align with the specific needs of a construction project.

This product is SHI Indoor Air Quality certified and recommended by Sentinel Holding Institut. Indoor-air-focused construction, renovation, and operation of buildings is made possible by transparent and verifiable criteria thanks to the Sentinel Holding concept.

Products bearing the Sentinel Holding Institute QNG-ready seal are suitable for projects aiming to achieve the "Qualitätssiegel Nachhaltiges Gebäude" (Quality Seal for Sustainable Buildings). QNG-ready products meet the requirements of QNG Appendix Document 3.1.3, "Avoidance of Harmful Substances in Building Materials." The KfW loan program Climate-Friendly New Construction with QNG may allow for additional funding.

The PEFC label certifies wood and wood products from sustainably managed forests and requires, among other things, legal origin, protection of forest ecosystems, and social minimum standards in forestry. Environmental organisations consider PEFC's criteria to be less strict than those of FSC, particularly regarding the protection of sensitive forest areas. Health-related aspects of the final product are not part of the PEFC assessment.

# Addendum to certificate HFA-PEFC-COC-0211

Date of issuance: 26.09.2023

## Scope of Multi-Site-Certification:

Product category		Product name	CoC-method
010100	Sawlogs and veneer logs	Rundholz	Physical separation method Credit method
010300	Chips and particles	Sägenebenprodukte	Physical separation method Credit method
010300	Chips and particles	Sägenebenprodukte	Physical separation method Credit method
010400	Wood residues	Sägenebenprodukte	Physical separation method Credit method
020300	Pellets and brickets	Pellets, Briketts	Physical separation method Credit method
030100	Sawnwood	Schnittholz	Physical separation method Credit method
030100	Sawnwood	Hobelwaren	Physical separation method Credit method
030100	Sawnwood	Schnittholz	Physical separation method Credit method
040100	Cross Laminated Timber (CLT)	Massivholzplatten	Physical separation method Credit method
040200	Finger Jointed Lumber	Schnittholz	Physical separation method Credit method
040300	Glue Laminated Products (Glulam)	Verklebte Holzbauprodukte	Physical separation method Credit method
040400	Laminated Veneer Lumber (LVL)	Verklebte Holzbauprodukte	Physical separation method Credit method
060101	Packaging and crates	Paletten	Physical separation method Credit method
060103	Pallets	Paletten	Physical separation method Credit method
