## SHI Product Assessment 2024

Since 2008, Sentinel Holding Institut GmbH (SHI) has been establishing a unique standard for products that support healthy indoor air. Experts carry out independent product assessments based on clear and transparent criteria. In addition, the independent testing company SGS regularly audits the processes and data accuracy.

| Criteria               | Product category | Assessment                  |

## QNG - Qualitätssiegel Nachhaltiges Gebäude

The Qualitätssiegel Nachhaltiges Gebäude (Quality Seal for Sustainable Buildings), developed by the German Federal Ministry for Housing, Urban Development and Building (BMWSB), defines requirements for the ecological, socio-cultural, and economic quality of buildings. The Sentinel Holding Institut evaluates construction products in accordance with QNG requirements for certification and awards the QNG ready label. Compliance with the QNG standard is a prerequisite for eligibility for the KfW funding programme. For certain product groups, the QNG currently has no specific requirements defined. Although classified as not assessment-relevant, these products remain suitable for QNG-certified projects.

| Criteria                                           | Pos. / product group | Considered substances | QNG assessment                             |
|----------------------------------------------------|----------------------|-----------------------|--------------------------------------------|
| 3.1.3<br>Schadstoffvermeidung in<br>Baumaterialien | not applicable       | not applicable        | QNG ready - Not relevant for<br>assessment |

## DGNB New Construction 2023

The DGNB System (German Sustainable Building Council) assesses the sustainability of various types of buildings. It can be applied to both large-scale private and commercial projects as well as smaller residential buildings. The 2023 version sets high standards for ecological, economic, socio-cultural, and functional aspects throughout the entire life cycle of a building.

| Criteria                                                     | No. / Relevant building components / construction materials / surfaces   | Considered substances / aspects | Quality level   |
|--------------------------------------------------------------|--------------------------------------------------------------------------|---------------------------------|-----------------|
| ENV 1.2 Local environmental impact, 03.05.2024 (3rd edition) | 32 All of the shell's aluminium and stainless steel building components. | Chromium VI                     | Quality level 4 |

**Verification:** Herstellererklärung vom 18.07.2025

| Criteria                                              | Assessment                                              |
|-------------------------------------------------------|---------------------------------------------------------|
| TEC1.4 Use and integration of building technology (*) | May positively contribute to the overall building score |

**Verification:** Beim Einsatz von Motorisierter Ausführung können die Elemente in die Gebäudeautomatisation integriert werden. Beim Einsatz von SOLAR-POWER kann das Produkt autark betrieben werden.

| Criteria                             | Assessment                                              |
|--------------------------------------|---------------------------------------------------------|
| ENV1.1 Climate action and energy (*) | May positively contribute to the overall building score |

**Verification:** Beim Einsatz von SOLAR-POWER kann das Produkt autark betrieben werden.

## **BNB-BN Neubau V2015**

The Bewertungssystem Nachhaltiges Bauen (Assessment System for Sustainable Building) is a tool for evaluating public office and administrative buildings, educational facilities, laboratory buildings, and outdoor areas in Germany. The BNB was developed by the former Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) and is now overseen by the Federal Ministry for Housing, Urban Development and Building (BMWSB).

| Criteria                                                | Pos. / product type                                          | Considered substance group | Quality level   |
|---------------------------------------------------------|--------------------------------------------------------------|----------------------------|-----------------|
| 1.1.6 Risiken für die lokale Umwelt                     | 27 Anodized aluminum and passivated stainless steel surfaces | Heavy metals (chromium VI) | Quality level 5 |
| <b>Verification:</b> Herstellererklärung vom 18.07.2025 |                                                              |                            |                 |

Product:

**Growe / Roltex Rolltorsysteme**

SHI Product Passport no.:

**15411-10-1004**

## EU taxonomy

The EU Taxonomy classifies economic activities and products according to their environmental impact. At the product level, the EU regulation defines clear requirements for harmful substances, formaldehyde and volatile organic compounds (VOCs). The Sentinel Holding Institut GmbH labels qualified products that meet this standard.

| Criteria                                | Product type | Considered substances           | Assessment            |
|-----------------------------------------|--------------|---------------------------------|-----------------------|
| DNSH - Pollution prevention and control |              | Substances according to Annex C | EU taxonomy compliant |

**Verification:** Herstellererklärung vom 18.07.2025

Product:

**Growe / Roltex Rolltorsysteme**

SHI Product Passport no.:

**15411-10-1004**

## **BREEAM DE Neubau 2018**

BREEAM (Building Research Establishment Environmental Assessment Methodology) is a UK-based building assessment system that evaluates the sustainability of new constructions, refurbishments, and conversions. Developed by the Building Research Establishment (BRE), the system aims to assess and improve the environmental, economic, and social performance of buildings.

| Criteria                  | Product category | Considered substances | Quality level               |
|---------------------------|------------------|-----------------------|-----------------------------|
| Hea 02 Indoor Air Quality |                  |                       | Not relevant for assessment |

Product:

**Growe / Roltex Rolltorsysteme**

SHI Product Passport no.:

**15411-10-1004**

## Product labels

In the construction industry, high-quality materials are crucial for a building's indoor air quality and sustainability. Product labels and certificates offer guidance to meet these requirements. However, the evaluation criteria of these labels vary, and it is important to carefully assess them to ensure products align with the specific needs of a construction project.

Products bearing the Sentinel Holding Institute QNG-ready seal are suitable for projects aiming to achieve the "Qualitätssiegel Nachhaltiges Gebäude" (Quality Seal for Sustainable Buildings). QNG-ready products meet the requirements of QNG Appendix Document 3.1.3, "Avoidance of Harmful Substances in Building Materials." The KfW loan program Climate-Friendly New Construction with QNG may allow for additional funding.

## Legal notices

(\*) These criteria apply to the construction project as a whole. While individual products can positively contribute to the overall building score through proper planning, the evaluation is always conducted at the building level. The information was provided entirely by the manufacturer.

## Herstellereklärung – Torsysteme

**Produkthersteller:** **Growe Rolladen- u. Bauelemente GmbH**

III Hüllenweg 36

26676 Barßel

**B.Growe GmbH**

Prignitzer Straße 18

16909 Wittstock

**Growe Rollladenbau GmbH**

Am alten Wasserwerk 2

06429 Nienburg (Saale)

**Roltex Rolladenfabrikation GmbH**

Zum Gewerbegebiet 4

04769 Mügeln

**Datum:** 18.07.2025

Hiermit bestätigen wir als Hersteller der **Torsysteme**, dass bei der Konstruktion und Produktion des Gesamttypensystems die Vorgaben der EU-Chemikalienverordnung REACH (EG Nr. 1907/2006) sowie die Anforderungen der EU-Taxonomie bezüglich möglicher Schadstoffbelastungen eingehalten werden.

### **Bestätigung zu SVHC-Stoffen:**

Die Torelemente enthalten gemäß der aktuellen Kandidatenliste der Europäischen Chemikalienagentur (ECHA; Stand 21.01.2025) keine besonders besorgniserregenden Stoffe (SVHC, Substances of Very High Concern) in einer Konzentration von  $\geq 0,1$  Gewichtsprozent (w/w).

### **Bestätigung zu CMR-Stoffen 1A/1B:**

Weiterhin bestätigen wir, dass im Gesamttypensystem der Torelemente keine Stoffe, die als CMR (krebserzeugend, mutagen oder reproduktionstoxisch) der Kategorien 1A oder 1B eingestuft sind, in Konzentrationen  $\geq 0,1$  Gewichtsprozent (w/w) eingesetzt oder enthalten sind.

**Komponenten:** **DGNB relevante Eigenschaften, QNG- BEB Anforderung**

|                                         |                                                       |
|-----------------------------------------|-------------------------------------------------------|
| Aluminium- Druckgussystemteile:         | Cadmium, Chrom VI oder deren Verbindungen.            |
| Aluminium-Torprofile:                   | Der Blei- und Zinngehalt des Produktes ist <0,1%      |
| Torsystemteile, Zubehör:                | SVHC gemäß REACH ist <0,1%                            |
| Aluminium/Pulverbeschichtung:           | Die Oberflächenveredelung erfolgt chromoxid-frei.     |
| Abschluss- Konstruktionsprofile:        | Pigmente und Sikkative im Produkt sind frei von Blei, |
| Stahlblendkappen, -wellen,<br>-zubehör: | Die Oberflächenveredelung erfolgt chromoxid-frei      |

**Konkrete Umsetzung:**

- Zur Herstellung der Torelemente werden vornehmlich **Aluminium- Druckgussystemteile** verwendet. In den zugekauften und eingesetzten Komponenten liegt keine Überschreitung der genannten Grenzwerte für SVHC- und CMR-Stoffe der Kategorie 1A/1B vor.
- Die gesamte Entwicklungs- und Produktionskette wird regelmäßig hinsichtlich gesetzlicher Änderungen und neuer Einträge in die SVHC- und CMR-Listen überwacht, aktuelle Informationen unserer Zulieferer werden dokumentiert und in die Bewertung einbezogen
- Damit ist die Konformität der Torelemente des Gesamttypsensystems nach dem Stand der Technik und Gesetzgebung sichergestellt.

**Gültigkeit:** Diese Erklärung gilt für das Gesamtypensystem der **Torelemente** und ist analog zu den Anforderungen der EU-Taxonomie für nachhaltiges Bauen zu verstehen.

Rechtsverbindliche, unterschriebene Originale der Herstellererklärung können nach individueller Anforderung zur Verfügung gestellt werden.

Diese Erklärung basiert auf den aktuellen Herstellerangaben, technischen Produktinformationen und relevanten rechtlichen Vorgaben entsprechend der laufenden REACH- und CLP-Regulierung
