

Customer Information

Statement of product compliance with environmental product declaration

To Whom It May Concern,

Weiss Chemie + Technik is a member of the German industrial association "Klebstoffe" (Adhesives) and thus an indirect member of the European association FEICA (Association of the European Adhesive & Sealant Industry) FEICA has developed sample environmental product declarations for products based on polyurethane or silane-modified polymer. These have been verified by the independent Institute "Bauen und Umwelt" (IBU). The verified sample environmental product declarations have been published by the industrial association "Klebstoffe" and the Institute "Bauen und Umwelt". As a member of the industrial association "Klebstoffe" we have exclusive possibilities to check if our products are covered by the sample-EPD according to the EPD-guidelines and our product recipes. With that declaration we assure that we have tested with the available EPD-guidelines and that below stated products are covered by the sample-EPD. This means that all stated information, e.g. the ecological balance data and other contents of the sample-EPD are relevant for the below stated product and for the evaluation of the sustainability of buildings where the below stated product has been used.

Please contact us for further questions.

Product Name	COSMO® PU-160.420 (COSMOPUR 1865)
Amount of points according to EPD guidelines	< 5.300 points
Title of Sample EPD	Products based on polyurethane or silane-modified polymer, group 2
Declaration number	EPD-FEI-20220106-IBG1-EN
